

# SAFETY DATA SHEET

# BioOcean® Mouse Leptin ELISA Kit

#### Section 1. Identification

GHS product identifier Code: BioOcean® Mouse Leptin ELISA Kit, EK297

Other means of identification: Not available Trade name: Mouse Leptin ELISA Kit

Supplier/Manufacturer 3550 Lexington Ave, Suite 203, Shoreview, Minnesota 55126

In case of emergency: Bio-Ocean: 1-800-852-7601

### Section 2. Hazards identification

operated in positive pressure mode.

Fire-fighters should wear appropriate protective equipment and selfcontained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

Section 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

For non-emergency personnel

No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Put on appropriate personal protective equipment.

For emergency responders

If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non- emergency personnel".

**Environmental precautions** 

Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

#### Methods and materials for containment and cleaning up

Small spill

Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.

Large spill

Stop leak if without risk. Move containers from spill area. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

# Section 7. Handling and storage

Precautions for safe handling
Protective measures

BioOcean® anti-Mouse Leptin detect antibody(100X)

Put on appropriate personal protective equipment (see Section 8). Put on appropriate personal protective equipment (see Section 8).

BioOcean® Mouse Leptin Standard (lyophilized)

BioOcean® Stop Solution

### Section 8. Exposure controls/personal protection

Control parameters
Occupational exposure limits
None

Appropriate engineering controls

Good general ventilation should be sufficient to control worker exposure to airborne contaminants.

**Environmental exposure controls** 

Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

Individual protection measures
Hygiene measures

Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

Eye/face protection

Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with right philids.

Skin protection

Hand protection

Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary.

Body protection

Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Other skin protection

Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the

Respiratory protection

indicates this is necessary. Respirator selection must be based on known or a hazards of the product and the safe working limits of the selected respirator.

BioOcean® Stop Solution 1.1-1.3			BioOcean® Stop Solution	1.1-1.3

Boiling/condensation point	BioOcean® anti-Mouse Leptin detect antibody(100X) BioOcean® Mouse Leptin Standard (lyophilized) BioOcean® PBS Buffer with Tween 20 (Assay, Diluent or Washing buffer) BioOcean® Streptavidin-HRP (100x) and Substrate Reagent BioOcean® Stop Solution	Not available.  Not available.  Not available.  Not available.  Not available.  Not available.
Melting/freezing point	BioOcean® anti-Mouse Leptin detect antibody(100X) BioOcean® Mouse Leptin Standard (lyophilized) BioOcean® PBS Buffer with Tween 20 (Assay, Diluent or Washing buffer) BioOcean® Streptavidin-HRP (100x) and Substrate Reagent BioOcean® Stop Solution	Not available.  Not available.  Not available.  Not available.  Not available.
Relative density	BioOcean® anti-Mouse Leptin detect antibody(100X) BioOcean® Mouse Leptin Standard (lyophilized) BioOcean® PBS Buffer with Tween 20 (Assay, Diluent or Washing buffer) BioOcean® Streptavidin-HRP (100x) and Substrate Reagent BioOcean® Stop Solution	Not available.  Not available.  Not available.  Not available.  Not available.
Vapor pressure	BioOcean® anti-Mouse Leptin detect antibody(100X) BioOcean® Mouse Leptin Standard (lyophilized) BioOcean® PBS Buffer with Tween 20 (Assay, Diluent or Washing buffer) BioOcean® Streptavidin-HRP (100x) and Substrate Reagent BioOcean® Stop Solution	Not available.  Not available.  Not available.  Not available.  Not available.
Vapor density	BioOcean® anti-Mouse Leptin detect antibody(100X) BioOcean® Mouse Leptin Standard (lyophilized) BioOcean® PBS Buffer with Tween 20 (Assay, Diluent or Washing buffer) BioOcean® Streptavidin-HRP (100x) and Substrate Reagent BioOcean® Stop Solution	Not available.  Not available.  Not available.  Not available.  Not available.
Volatility	BioOcean® anti-Mouse Leptin detect antibody(100X) BioOcean® Mouse Leptin Standard (lyophilized) BioOcean® PBS Buffer with Tween 20 (Assay, Diluent or Washing buffer) BioOcean® Streptavidin-HRP (100x) and Substrate Reagent BioOcean® Stop Solution	Not available.  Not available.  Not available.  Not available.  Not available.
Evaporation rate	BioOcean® anti-Mouse Leptin detect antibody(100X) BioOcean® Mouse Leptin Standard (lyophilized) BioOcean® PBS Buffer with Tween 20 (Assay, Diluent or Washing buffer) BioOcean® Streptavidin-HRP (100x) and Substrate Reagent BioOcean® Stop Solution	Not available.  Not available.  Not available.  Not available.  Not available.
Viscosity	BioOcean® anti-Mouse Leptin detect antibody(100X) BioOcean® Mouse Leptin Standard (lyophilized) BioOcean® PBS Buffer with Tween 20 (Assay, Diluent or Washing buffer) BioOcean® Streptavidin-HRP (100x) and Substrate Reagent	Not available.  Not available.  Not available.  Not available.

BioOcean® Stop Solution Not available. BioOcean® anti-Mouse Leptin detect Not available. Solubility antibody(100X) BioOcean® Mouse Leptin Standard Not available. (lyophilized) BioOcean® PBS Buffer with Tween 20 (Assay, Not available. Diluent or Washing buffer) BioOcean® Streptavidin-HRP (100x) and Not available. Substrate Reagent Not available. BioOcean® Stop Solution BioOcean® anti-Mouse Leptin detect Not available. Physical/chemical properties antibody(100X) comments BioOcean® Mouse Leptin Standard Not available. (lyophilized) BioOcean® PBS Buffer with Tween 20 (Assay, Not available. Diluent or Washing buffer) BioOcean® Streptavidin-HRP (100x) and Not available. Substrate Reagent BioOcean® Stop Solution Not available. Section 10. Stability and reactivity BioOcean® anti-Mouse Leptin detect No specific test data related to reactivity available for this product or Reactivity antibody(100X) its ingredients BioOcean® Mouse Leptin Standard No specific test data related to reactivity available for this product or (lyophilized) its ingredients. BioOcean® PBS Buffer with Tween 20 (Assay, No specific test data related to reactivity available for this product or Diluent or Washing buffer) its ingredients. BioOcean® Streptavidin-HRP (100x) and No specific test data related to reactivity available for this product or Substrate Reagent its ingredients. BioOcean® Stop Solution No specific test data related to reactivity available for this product or its ingredients. BioOcean® anti-Mouse Leptin detect The product is stable. Chemical stability antibody(100X) BioOcean® Mouse Leptin Standard The product is stable. (lyophilized) BioOcean® PBS Buffer with Tween 20 (Assay, The product is stable. Diluent or Washing buffer) BioOcean® Streptavidin-HRP (100x) and The product is stable. Substrate Reagent BioOcean® Stop Solution The product is stable. BioOcean® anti-Mouse Leptin detect Under normal conditions of storage and use, hazardous reactions will Possibility of hazardous reactions antibody(100X) not occur. Under normal conditions of storage and use, hazardous reactions will not occur. BioOcean® Mouse Leptin Standard Under normal conditions of storage and use, hazardous reactions will (lyophilized) not occur. Under normal conditions of storage and use, hazardous reactions will not occur. BioOcean® PBS Buffer with Tween 20 (Assay, Under normal conditions of storage and use, hazardous reactions will not occur. Under normal conditions of storage and use, hazardous Diluent or Washing buffer) reactions will not occur. BioOcean® Streptavidin-HRP (100x) and Under normal conditions of storage and use, hazardous reactions will Substrate Reagent not occur. Under normal conditions of storage and use, hazardous reactions will not occur. BioOcean® Stop Solution Under normal conditions of storage and use, hazardous reactions will not occur. Under normal conditions of storage and use, hazardous reactions will not occur. BioOcean® anti-Mouse Leptin detect No specific data. Conditions to avoid antibody(100X) BioOcean® Mouse Leptin Standard No specific data. (lyophilized) BioOcean® PBS Buffer with Tween 20 (Assay, No specific data. Diluent or Washing buffer) BioOcean® Streptavidin-HRP (100x) and No specific data Substrate Reagent BioOcean® Stop Solution No specific data. BioOcean® anti-Mouse Leptin detect No specific data. Incompatible materials antibody(100X)

# Section 11. Toxicological information

Information on toxicological effects
Acute toxicity: Not available.
Irritation/Corrosion: Not available.
Sensitization: Not available.
Mutagenicity: Not available.
Carringgenicity: Not available.

Carcinogenicity: Not available.
Reproductive toxicity: Not available.
Teratogenicity: Not available.

Specific target organ toxicity (single exposure): Not available. Specific target organ toxicity (repeated exposure): Not available.

Aspiration hazard: Not available.

Information on the likely routes of exposure: Not available.

Potential acute health effects Eye contact: Not available. Inhalation: Not available. Skin contact: Not available. Ingestion: Not available.

Symptoms related to the physical, chemical and toxicological characteristics

Eye contact: Not available. Inhalation: Not available. Skin contact: Not available. Ingestion: Not available.

Delayed and immediate effects and also chronic effects from short and long term exposure

Short term exposure: Not available.
Potential immediate effects: Not available.
Potential delayed effects: Not available.
Long term exposure: Not available.

Potential immediate effects: Not available. Potential delayed effects: Not available.

Potential chronic health effects: General: Not available.

Carcinogenicity: Not available. Mutagenicity: Not available.

Teratogenicity: Not available.

Developmental effects: Not available.

Fertility effects: Not available.

Numerical measures of toxicity Acute toxicity estimates: Not available.

Interactive effects: Not available. Other information: Not available.

### Section 12. Ecological information

Toxicity: Not available.

Persistence and degradability: Not available. Bioaccumulative potential: Not available.

Mobility in soil

Soil/water partition: coefficient (Koc)

BioOcean® anti-Mouse Leptin detect antibody(100X)

BioOcean® Mouse Leptin Standard (lyophilized)

BioOcean® PBS Buffer with Tween 20 (Assay, Diluent or Washing buffer)

BioOcean® Streptavidin-HRP (100x) and Substrate
Reagent

BioOcean® Stop Solution

Not available.

Not available.

Mobility: Not available.

Other adverse effects: No known significant effects or critical hazards.

# Section 13. Disposal considerations

Disposal methods: The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

# Section 14. Transport information

	DOT Classification	TDG Classification	Mexico Classification	ADR/RID	IMDG	IATA
UN number UN proper shipping name	Not available. Not available.					
Packing group	-	-	-	-	-	-
Environmental hazards	No.	No.	No.	No.	No.	No.
Additional information	_	_	_	_	_	_

Special precautions for user: Transport within user's premises: always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code: Not available.

# Section 15. Regulatory information

U.S. Federal regulations: TSCA 8(a) CDR Exempt/Partial exemption: Not determined

United States inventory (TSCA 8b): Not determined.

Clean Air Act Section 112 (b) Hazardous Air Pollutants (HAPs): Not listed

Clean Air Act Section 602 Class I Substances: Not listed Clean Air Act Section 602 Class II Substances: Not listed DEA List I Chemicals (Precursor Chemicals): Not listed DEA List II Chemicals (Essential Chemicals): Not listed SARA 302/304 Composition/information on ingredients

CEPA Toxic substances: None of the components are listed

Canada inventory: Not determined.

#### Section 16. Other information

Hazardous Material Information System (U.S.A.)

The customer is responsible for determining the PPE code for this material.

National Fire Protection Association (U.S.A.)

#### History

Date of issue/Date of revision: 6/11/2016
Date of previous issue: No previous validation.

Version: 1

### Section 16. Other information

Key to abbreviations:

ATE = Acute Toxicity Estimate

BCF = Bioconcentration Factor

GHS = Globally Harmonized System of Classification and Labelling of Chemicals

IATA = International Air Transport Association

IBC = Intermediate Bulk Container

IMDG = International Maritime Dangerous Goods

LogPow = logarithm of the octanol/water partition coefficient

MARPOL 73/78 = International Convention for the Prevention of Pollution From Ships, 1973 as modified by the Protocol of
1978. ("Marpol" = marine pollution)

UN = United Nations
