

# SAFETY DATA SHEET

BioOcean<sup>®</sup> Human FGFR2/CD332 ELISA Kit

## Section 1. Identification

GHS product identifier Code: BioOcean® Human FGFR2/CD332 ELISA Kit, EK1242 Other means of identification: Not available Trade name: Human FGFR2/CD332 ELISA Kit Supplier/Manufacturer 3550 Lexington Ave, Suite 203, Shoreview, Minnesota 55126 In case of emergency: Bio-Ocean: 1-800-852-7601

## Section 2. Hazards identification

OSHA/HCS status:	BioOcean® anti-Human FGFR2 detect antibody(100X)	While this material is not considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910. 1200), this MSDS contains valuable information critical to the safe handling and proper use of the product. This MSDS should be retained and available for employees and other users of this product.
	BioOcean® Human FGFR2 Standard (lyophilized)	While this material is not considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910. 1200), this MSDS contains valuable information critical to the safe handling and proper use of the product. This MSDS should be retained and available for employees and other users of this product.
	BioOcean® PBS Buffer with Tween 20 (Assay, Diluent or Washing buffer)	While this material is not considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910. 1200), this MSDS contains valuable information critical to the safe handling and proper use of the product. This MSDS should be retained and available for employees and other users of this product.
	BioOcean <sup>®</sup> Substrate Reagent	While this material is not considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910. 1200), this MSDS contains valuable information critical to the safe handling and proper use of the product. This MSDS should be retained and available for employees and other users of this product.
	BioOcean <sup>®</sup> Stop Solution	While this material is not considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910. 1200), this MSDS contains valuable information critical to the safe handling and proper use of the product. This MSDS should be retained and available for employees and other users of this product.
Classification of the substance or mixture:	BioOcean <sup>®</sup> anti-Human FGFR2 detect antibody(100X)	Not classified.
of mixture.	BioOcean <sup>®</sup> Human FGFR2 Standard (lyophilized)	Not classified.
	BioOcean® PBS Buffer with Tween 20 (Assay, Diluent or Washing buffer)	Not classified.
	BioOcean <sup>®</sup> Substrate Reagent	Not classified.
	BioOcean <sup>®</sup> Stop Solution	Not classified.
GHS label elements	BioOcean <sup>®</sup> anti-Human FGFR2 detect	No signal word.
Signal word	antibody(100X) BioOcean® Human FGFR2 Standard (lyophilized)	No signal word.
	BioOcean® PBS Buffer with Tween 20 (Assay, Diluent or Washing buffer)	No signal word.
	BioOcean <sup>®</sup> Substrate Reagent	No signal word.
	BioOcean <sup>®</sup> Stop Solution	No signal word.
Hazard statements	BioOcean® anti-Human FGFR2 detect antibody(100X)	No known significant effects or critical hazards.
	BioOcean® Human FGFR2 Standard (lyophilized)	No known significant effects or critical hazards.
	BioOcean <sup>®</sup> PBS Buffer with Tween 20 (Assay, Diluent or Washing buffer)	No known significant effects or critical hazards.
	BioOcean <sup>®</sup> Substrate Reagent	No known significant effects or critical hazards.
	BioOcean <sup>®</sup> Stop Solution	No known significant effects or critical hazards.
Precautionary statements General	BioOcean® anti-Human FGFR2 detect antibody(100X)	Not applicable.
-	BioOcean <sup>®</sup> Human FGFR2 Standard (lyophilized)	Not applicable.
	BioOcean <sup>®</sup> PBS Buffer with Tween 20 (Assay, Diluent or Washing buffer)	Not applicable.
	BioOcean <sup>®</sup> Substrate Reagent	Not applicable.

Disposal	BioOcean <sup>®</sup> anti-Human FGFR2 detect antibody(100X)	Not applicable.
	BioOcean <sup>®</sup> Human FGFR2 Standard (lyophilized)	Not applicable.
	BioOcean® PBS Buffer with Tween 20 (Assay, Diluent or Washing buffer)	Not applicable.
	BioOcean <sup>®</sup> Substrate Reagent	Not applicable.
	BioOcean <sup>®</sup> Stop Solution	Not applicable.
Supplemental label elements	BioOcean <sup>®</sup> anti-Human FGFR2 detect antibody(100X)	None known.
	BioOcean <sup>®</sup> Human FGFR2 Standard (lyophilized)	None known.
	BioOcean® PBS Buffer with Tween 20 (Assay, Diluent or Washing buffer)	None known.
	BioOcean <sup>®</sup> Substrate Reagent	None known.
	BioOcean <sup>®</sup> Stop Solution	None known.
Hazards not otherwise classified	BioOcean® anti-Human FGFR2 detect antibody(100X)	None known.
	BioOcean <sup>®</sup> Human FGFR2 Standard (lyophilized)	None known.
	BioOcean® PBS Buffer with Tween 20 (Assay, Diluent or Washing buffer)	None known.
	BioOcean <sup>®</sup> Substrate Reagent	None known.
	BioOcean <sup>®</sup> Stop Solution	None known.

## Section 3. Composition/information on ingredients

Substance/mixture: Mixture		
Ingredient name	%	CAS number
BioOcean <sup>®</sup> Human FGFR2 Standard	99.9-100	-

Any concentration shown as a range is to protect confidentiality or is due to batch variation. There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section. Occupational exposure limits, if available, are listed in Section 8.

#### Section 4. First aid measures

Description of necessary first aid measures	
Eye contact	BioOcean <sup>®</sup> anti-Human FGFR2 detect antibody(100X)

Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Get medical attention if irritation occurs.

		A BETTER APPROACH FOR BIOLOGICAL RESEARCH
	BioOcean® Human FGFR2 Standard (lyophilized)	Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses.
	BioOcean <sup>®</sup> PBS Buffer with Tween 20 (Assay, Diluent or Washing buffer)	Get medical attention if irritation occurs. Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses.
	BioOcean <sup>®</sup> Substrate Reagent	Get medical attention if irritation occurs. Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses.
	BioOcean <sup>®</sup> Stop Solution	Get medical attention if irritation occurs. Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Get medical attention if irritation occurs.
Inhalation	BioOcean <sup>®</sup> anti-Human FGFR2 detect antibody(100X)	Remove victim to fresh air and keep at rest in a position comfortable for breathing. Get medical attention if symptoms occur.
	BioOcean® Human FGFR2 Standard (lyophilized)	Remove victim to fresh air and keep at rest in a position comfortable for breathing, Get medical attention if symptoms occur.
	BioOcean® PBS Buffer with Tween 20 (Assay, Diluent or Washing buffer) BioOcean® Substrate Reagent	Remove victim to fresh air and keep at rest in a position comfortable for breathing. Get medical attention if symptoms occur. Remove victim to fresh air and keep at rest in a position comfortable
	BioOcean <sup>®</sup> Stop Solution	for breathing. Get medical attention if symptoms occur. Remove victim to fresh air and keep at rest in a position comfortable for breathing. Get medical attention if symptoms occur.
Skin contact	BioOcean <sup>®</sup> anti-Human FGFR2 detect	Flush contaminated skin with plenty of water. Remove contaminated
Skir contact	antibody(100X) BioOcean® Human FGFR2 Standard (lyophilized)	clothing and shoes. Get medical attention if symptoms occur. Flush contaminated skin with plenty of water. Remove contaminated

	BioOcean <sup>®</sup> Substrate Reagent	No specific data.
	BioOcean <sup>®</sup> Stop Solution	No specific data.
Ingestion	BioOcean® anti-Human FGFR2 detect antibody(100X) BioOcean® Human FCFR2 Chandrad (humbilized)	No specific data.
	BioOcean® Human FGFR2 Standard (lyophilized)	No specific data.
	BioOcean® PBS Buffer with Tween 20 (Assay, Diluent or Washing buffer) BioOcean® Substrate Reagent	No specific data. No specific data.
	BioOcean <sup>®</sup> Stop Solution	No specific data.
	Storecult Stop Solution	the specific data.

Indication of immediate medical attention and special treatment needed, if necessary, see toxicological information (Section 11)

Notes to physician	Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.
Specific treatments	No specific treatment
Protection of first-aiders	No action shall be taken involving any personal risk or without suitable training.

## Section 5. Fire-fighting measures

Extinguishing media		
Suitable extinguishing media	BioOcean® anti-Human FGFR2 detect antibody(100X)	Use an extinguishing agent suitable for the surrounding fire.
	BioOcean <sup>®</sup> Human FGFR2 Standard (lyophilized)	Use an extinguishing agent suitable for the surrounding fire.
	BioOcean <sup>®</sup> PBS Buffer with Tween 20 (Assay, Diluent or Washing buffer)	Use an extinguishing agent suitable for the surrounding fire.
	BioOcean <sup>®</sup> Substrate Reagent	Use an extinguishing agent suitable for the surrounding fire.
	BioOcean <sup>®</sup> Stop Solution	Use an extinguishing agent suitable for the surrounding fire.
Unsuitable extinguishing media	BioOcean <sup>®</sup> anti-Human FGFR2 detect antibody(100X)	None known.
	BioOcean <sup>®</sup> Human FGFR2 Standard (lyophilized)	None known.
	BioOcean® PBS Buffer with Tween 20 (Assay, Diluent or Washing buffer)	None known.

#### SDS, BioOcean<sup>®</sup> Human FGFR2/CD332 ELISA Kit V1

SDS, BIOOCEAII <sup>®</sup> Huillall FGFR2/CD	552 ELISA NIL VI	DIOUCEAN	
		A BETTER APPROACH FOR BIOLOGICAL RESEARCH	
	BioOcean <sup>®</sup> Substrate Reagent	None known.	
	BioOcean <sup>®</sup> Stop Solution	None known.	
Specific hazards arising from the chemical	BioOcean® anti-Human FGFR2 detect antibody(100X)	In a fire or if heated, a pressure increase will occur and the container may burst.	
	BioOcean <sup>®</sup> Human FGFR2 Standard (lyophilized)	In a fire or if heated, a pressure increase will occur and the container may burst.	
	BioOcean <sup>®</sup> PBS Buffer with Tween 20 (Assay, Diluent or Washing buffer)	In a fire or if heated, a pressure increase will occur and the container may burst.	
	BioOcean <sup>®</sup> Substrate Reagent	In a fire or if heated, a pressure increase will occur and the container may burst.	
	BioOcean <sup>®</sup> Stop Solution	In a fire or if heated, a pressure increase will occur and the container may burst.	
Hazardous thermal decomposition products	BioOcean® anti-Human FGFR2 detect antibody(100X)	No specific data.	
	BioOcean <sup>®</sup> Human FGFR2 Standard (lyophilized)	No specific data.	
	BioOcean <sup>®</sup> PBS Buffer with Tween 20 (Assay, Diluent or Washing buffer)	No specific data.	
	BioOcean <sup>®</sup> Substrate Reagent	No specific data.	
	BioOcean <sup>®</sup> Stop Solution	No specific data.	
Special protective actions for fire-fighters	BioOcean® anti-Human FGFR2 detect antibody(100X)	Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.	
	BioOcean <sup>®</sup> Human FGFR2 Standard (lyophilized)	Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.	
	BioOcean® PBS Buffer with Tween 20 (Assay, Diluent or Washing buffer)	Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving	
	BioOcean <sup>®</sup> Substrate Reagent	any personal risk or without suitable training. Promptly isolate the scene by removing all persons from the vicinity	
		of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.	
	BioOcean <sup>®</sup> Stop Solution	Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.	
Special protective equipment for fire-fighters	BioOcean <sup>®</sup> anti-Human FGFR2 detect antibody(100X)	Fire-fighters should wear appropriate protective equipment and self- contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.	
	BioOcean <sup>®</sup> Human FGFR2 Standard (Iyophilized)	Fire-fighters should wear appropriate protective equipment and self- contained breathing apparatus (SCBA) with a full face-piece	
	BioOcean® PBS Buffer with Tween 20 (Assay, Diluent or Washing buffer)	operated in positive pressure mode. Fire-fighters should wear appropriate protective equipment and self- contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.	
	BioOcean <sup>®</sup> Substrate Reagent	Fire-fighters should wear appropriate protective equipment and self- contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.	
	BioOcean <sup>®</sup> Stop Solution	Fire-fighters should wear appropriate protective equipment and self- contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.	
Section 6. Accidental relea	ase measures		
Personal precautions, protective ed	quipment and emergency procedures		
For non-emergency personnel		rsonal risk or without suitable training. Evacuate surrounding areas. onnel from entering. Do not touch or walk through spilled material. Put ment.	
For emergency responders		with the spillage, take note of any information in Section 8 on suitable formation in "For non- emergency personnel".	
Environmental precautions	Avoid dispersal of spilled material and ru	noff and contact with soil, waterways, drains and sewers. Inform the used environmental pollution (sewers, waterways, soil or air).	
Methods and materials for contain	ment and cleaning up		
Small spill	Stop leak if without risk. Move containers	s from spill area. Dilute with water and mop up if water-soluble. b with an inert dry material and place in an appropriate waste disposal e disposal contractor.	
Large spill	confined areas. Wash spillages into an ef	Stop leak if without risk. Move containers from spill area. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place	

spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place

in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry,

## Section 8. Exposure controls/personal protection

#### **Control parameters**

Occupational exposure limits None

Appropriate engineering controls	Good general ventilation should be sufficient to control worker exposure to airborne contaminants.
Environmental exposure controls	Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.
Individual protection measures	
Hygiene measures	Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.
Eye/face protection	Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side- shields.
Skin protection	
Hand protection	Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary.
Body protection	Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
Other skin protection	Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
Respiratory protection	Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

## Section 9. Physical and chemical properties

Physical state	BioOcean <sup>®</sup> anti-Human FGFR2 detect antibody(100X)	Liquid.
	BioOcean <sup>®</sup> Human FGFR2 Standard (lyophilized)	Solid

# A BETTER APPROACH FOR BIOLOGICAL RESEARCH

## Section 10. Stability and reactivity

Section 10. Stability and rea	•			
Reactivity	BioOcean® anti-Human FGFR2 detect antibody(100X) BioOcean® Human FGFR2 Standard	No specific test data related to reactivity available for this product or its ingredients. No specific test data related to reactivity available for this product or its ingredients.		
	(lyophilized) BioOcean® PBS Buffer with Tween 20 (Assay, Diluent or Washing buffer)	its ingredients. No specific test data related to reactivity available for this product or its ingredients.		
	BioOcean <sup>®</sup> Substrate Reagent	No specific test data related to reactivity available for this product or its ingredients.		
	BioOcean <sup>®</sup> Stop Solution	No specific test data related to reactivity available for this product or its ingredients.		
Chemical stability	BioOcean <sup>®</sup> anti-Human FGFR2 detect antibody(100X)	The product is stable.		
	BioOcean <sup>®</sup> Human FGFR2 Standard (lyophilized)	The product is stable.		
	BioOcean® PBS Buffer with Tween 20 (Assay, Diluent or Washing buffer)	The product is stable.		
	BioOcean <sup>®</sup> Substrate Reagent BioOcean <sup>®</sup> Stop Solution	The product is stable. The product is stable.		
Possibility of hazardous reactions	BioOcean® anti-Human FGFR2 detect antibody(100X)	Under normal conditions of storage and use, hazardous reactions will not occur. Under normal conditions of storage and use, hazardous reactions will not occur.		
	BioOcean® Human FGFR2 Standard (lyophilized)	Under normal conditions of storage and use, hazardous reactions will not occur. Under normal conditions of storage and use, hazardous reactions will not occur.		
	BioOcean® PBS Buffer with Tween 20 (Assay, Diluent or Washing buffer)	Under normal conditions of storage and use, hazardous reactions will not occur. Under normal conditions of storage and use, hazardous reactions will not occur.		
	BioOcean <sup>®</sup> Substrate Reagent	Under normal conditions of storage and use, hazardous reactions will not occur. Under normal conditions of storage and use, hazardous reactions will not occur.		
	BioOcean <sup>®</sup> Stop Solution	Under normal conditions of storage and use, hazardous reactions will not occur. Under normal conditions of storage and use, hazardous reactions will not occur.		
Conditions to avoid	BioOcean <sup>®</sup> anti-Human FGFR2 detect antibody(100X)	No specific data.		
	BioOcean <sup>®</sup> Human FGFR2 Standard (lyophilized)	No specific data.		
	BioOcean® PBS Buffer with Tween 20 (Assay, Diluent or Washing buffer)	No specific data.		
	BioOcean <sup>®</sup> Substrate Reagent BioOcean <sup>®</sup> Stop Solution	No specific data. No specific data.		
Incompatible materials	BioOcean <sup>®</sup> anti-Human FGFR2 detect antibody(100X)	No specific data.		
	BioOcean® Human FGFR2 Standard (lyophilized)	No specific data.		
	BioOcean <sup>®</sup> PBS Buffer with Tween 20 (Assay, Diluent or Washing buffer)	No specific data.		
	BioOcean <sup>®</sup> Substrate Reagent BioOcean <sup>®</sup> Stop Solution	No specific data. No specific data.		
Hazardous decomposition products	BioOcean® anti-Human FGFR2 detect antibody(100X)	Under normal conditions of storage and use, hazardous decomposition products should not be produced. Under normal conditions of storage and use, hazardous decomposition products should not be produced.		
	BioOcean® Human FGFR2 Standard (lyophilized)	Under normal conditions of storage and use, hazardous decomposition products should not be produced. Under normal conditions of storage and use, hazardous decomposition products should not be produced.		
	BioOcean® PBS Buffer with Tween 20 (Assay, Diluent or Washing buffer)	Under normal conditions of storage and use, hazardous decomposition products should not be produced. Under normal conditions of storage and use, hazardous decomposition products should not be produced.		
	BioOcean <sup>®</sup> Substrate Reagent	Under normal conditions of storage and use, hazardous decomposition products should not be produced. Under normal conditions of storage and use, hazardous decomposition products should not be produced.		

Under normal conditions of storage and use, hazardous decomposition products should not be produced. Under normal conditions of storage and use, hazardous decomposition products

should not be produced.

## Section 11. Toxicological information

Information on toxicological effects Acute toxicity: Not available. Irritation/Corrosion: Not available. Sensitization: Not available. Mutagenicity: Not available. Carcinogenicity: Not available. Reproductive toxicity: Not available. Teratogenicity: Not available. Specific target organ toxicity (single exposure): Not available. Specific target organ toxicity (repeated exposure): Not available. Aspiration hazard: Not available. Information on the likely routes of exposure: Not available.

#### Potential acute health effects Eye contact: Not available. Inhalation: Not available. Skin contact: Not available. Ingestion: Not available.

Symptoms related to the physical, chemical and toxicological characteristics Eye contact: Not available. Inhalation: Not available.

Skin contact: Not available. Ingestion: Not available.

Delayed and immediate effects and also chronic effects from short and long term exposure				
Short term exposure: Not available.				
Potential immediate effects: Not available.				
Potential delayed effects: Not available.				
Long term exposure: Not available.				
Potential immediate effects: Not available.				
Potential delayed effects: Not available.				
Potential chronic health effects:				
General: Not available.				
Carcinogenicity: Not available.				
Mutagenicity: Not available.				
Teratogenicity: Not available.				
Developmental effects: Not available.				
Fertility effects: Not available.				
Numerical measures of toxicity Acute toxicity estimates: Not available.				
Interactive effects: Not available.				
Other information: Not available.				
Section 12. Ecological information				
Toxicity: Not available.				
Persistence and degradability: Not availab	ble.			
Bioaccumulative potential: Not available.				
Mobility in soil				
Soil/water partition: coefficient (K <sub>oc</sub> )	BioOcean® anti-Human FGFR2 detect antibody(100X)	Not available.		
	BioOcean <sup>®</sup> Human FGFR2 Standard (lyophilized)	Not available.		
	BioOcean <sup>®</sup> PBS Buffer with Tween 20 (Assay, Diluent or Washing buffer)	Not available.		
BioOcean® Substrate Reagent Not available.				
	BioOcean <sup>®</sup> Stop Solution	Not available.		

Mobility: Not available.

Other adverse effects: No known significant effects or critical hazards.

## Section 13. Disposal considerations

Disposal methods: The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

## Section 14. Transport information
